Man and His Endeavors Are As One.

In his search for understanding, he questioned... Challenged his observations... Studied the phenomena to discover the nature of himself.

He became one with his endeavors, measuring achievement by his need to know more, applying what he learned to exploring new unknowns that he might help others.

This is the commitment that is renewed each day for all of us who focus our resources on improving the quality of life through science.

The 18,000 people who are The Upjohn Company salute all who step boldly into the search for new discovery.
